

ChronosHub and LSBU

Leah Wong

Open Access Librarian
wongl5@lsbu.ac.uk

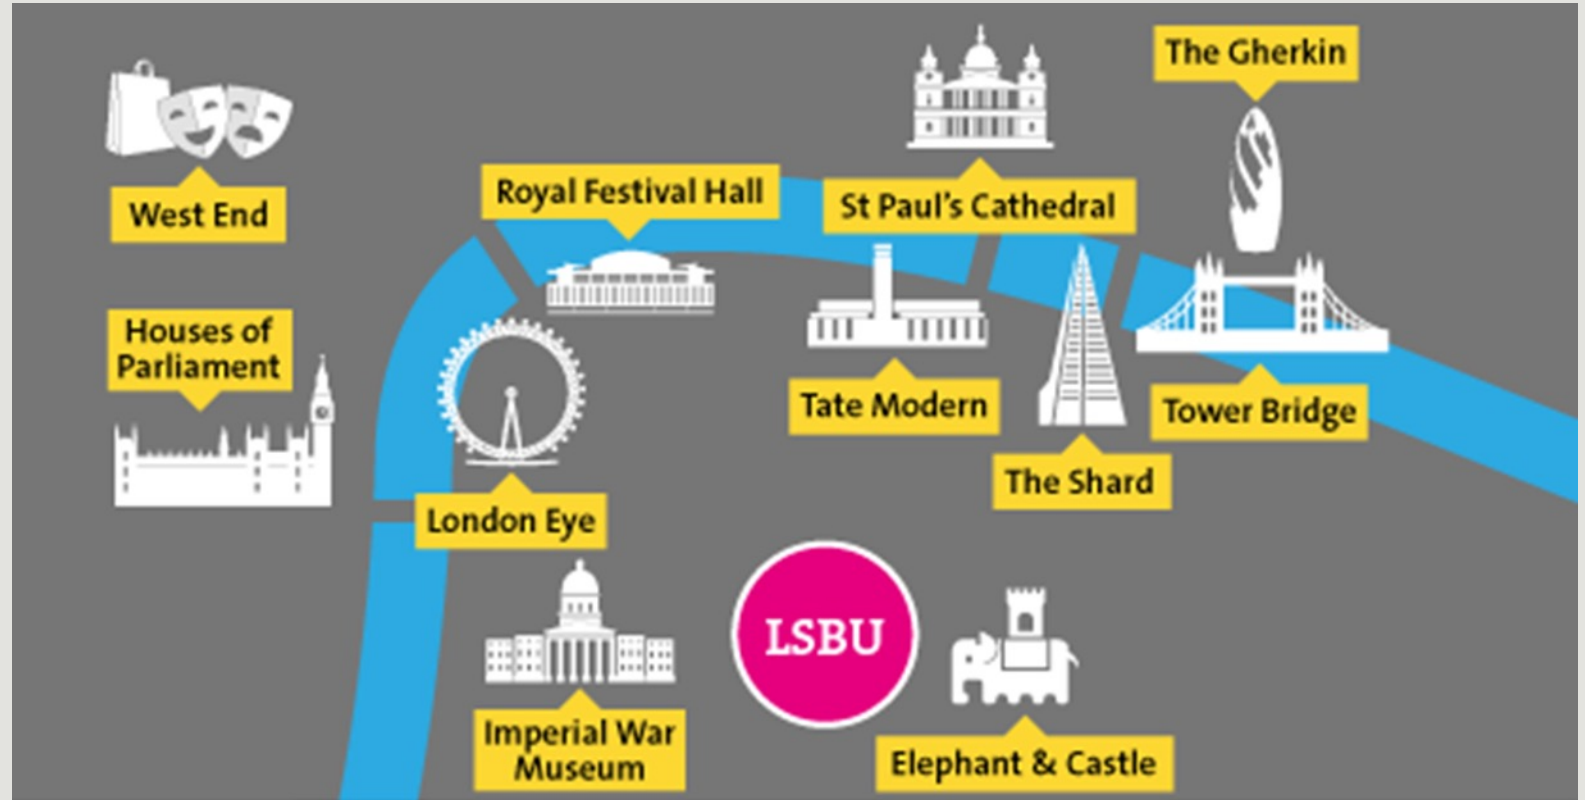

EST 1892
LSBU

London South Bank University

Background

- 17,500 students
- Research in engineering, architecture and sciences

Our OA approach

- Read and Publish deals
- UKRI block grant
- Library OA Fund

Why we signed up

- Simplify the process for our researchers
- Promote our Read and Publish deals
- Reduce enquiries

Setting up

- List of publisher agreements
- Wiley and BMJ exceptions
- Filters
- Branding

Public facing side

The screenshot shows the public-facing side of the ChronosHub Journal Guide. At the top right, there are links for "Privacy Notice", "Disclaimer", and the "ChronosHub" logo. The main header area features the title "Journal Guide" and a search bar with the placeholder text "Find the relevant journal for your article". A purple button with a mail icon and the text "Cannot find your journal?" is located in the top right corner of the main content area.

On the left side, there is a sidebar with the following sections:

- Subject Areas** (Show all (331))
 - Multidisciplinary (80)
 - Agricultural and Biological Sciences (1797)
 - Arts and Humanities (3719)
 - Biochemistry, Genetics and Molecular Biology (1844)
 - Business, Management and Accounting (1207)
 - Chemical Engineering (567)
 - Chemistry (974)
 - Computer Science (1525)
- Journal Lists**
 - Scopus (22754)
 - DOAJ (17768)
 - Journals with Agreements (9977)
- Publisher** (Show all (100))

The main content area displays "49561 Journals" and "Page 1 of 2479". Below this, there is a "Welcome to the Journal Guide" section with a paragraph of text: "The Journal Guide gives you peace of mind when selecting journals, so you don't have to worry about article processing charges (APCs) or non-compliance with your funder's policies. If you are a researcher from **London South Bank University** you can look up your favorite journals or search and filter to get to a selection of journals that match your research. Select a funder to see whether the journals are compliant or not, and check the filter 'Journals with agreements' to limit the list to journals for which the APCs are fully or partially waived." Below the text is a "Select Funder" button.

At the bottom of the main content area, there is a featured journal entry: "#Tear: Revista de Educação, Ciência e Tecnologia" with ISSN: 2238-8079 and eISSN: 2238-8079. It includes icons for Scopus and DOAJ.

Open Access

Open Access

Open Access enables your research outputs to be read, downloaded and mined for text and data for free. [LSBU Research & Innovation Portal](#) is LSBU's Open Access repository. This is a full text repository, meaning that every record has a text attached. All outputs on the repository are easily and freely accessible to the global public.

[LSBU's Open Access Policy](#) requires LSBU academics to upload the accepted manuscript of any research publication within three months of the acceptance date into the repository. All your research needs can now be addressed in one place: Pure. This is where you can create a record, and upload your research to be displayed on the repository.

Why Open Access is Important

Increased visibility benefits society and the wider economy

Easy access on our public facing repository, [LSBU Research & Innovation Portal](#), which is indexed by search engines and is free to access for anyone, allows people from all backgrounds to benefit from good research conducted in our institution.

Increased readership, usage and impact

Recent research found that there was a 15% increase in readership of a journal copy of a paper when deposited in an Open Access repository. Researchers from all over the world can have full access to your work without journal subscriptions. This helps LSBU to maximise its real world impact.

Encourages transparency, reproducibility and collaborations

Openness about the processes ensures clarity and trust in the research. For example, your data can be shared on our repository.

Research Excellence Framework

Uploading your work to an institutional repository in a timely manner ensures compliance with the REF Policy.
